## - Birds on Dynamic Boundaries -

24–30 June 2019

Alaska Public Lands Information Center: 605 W 4<sup>th</sup> Avenue, Anchorage

### Alaska's Birds Through the Lenses of the Cornell Lab of Ornithology

24–30 June (Mon–Sun), 12:30–1:30 pm, Main hall screen area

A selection of short-film documentaries about the birds of this great land and their journeys across the world. Bring in your lunch!

- Cornell Lab Introduction
- Alaska's Yukon Delta National Wildlife Refuge
- Through the Lens: Yellow-billed Loon
- Birds of the Yellow Sea
- Wetland Loss in the Yellow Sea
- Tracking Alaska's Godwits
- St. Matthew Island Expedition
- Bird Research and Shade-Grown Coffee

### Birds in Alaska Native Subsistence Cultures

24 June (Mon), 2:00–3:00 pm, Theater

For thousands of years, birds have been important food and cultural resources for Alaska's indigenous peoples. Dr. Lili Naves (Alaska Department of Fish & Game, Division of Subsistence) will share data and insights about this relationship between people and birds, and its importance in supporting community well-being.

### Connecting Birds and People Along the Pacific Flyway

25 June (Tue), 2:00–3:00 pm, Theater

The Forest Service has been working with partners to promote conservation, stewardship, and education through bird festivals. Erin Cooper (U.S. Forest Service) will share her experience coordinating with festival partners from Cordova, in Alaska, to Chile connecting communities and other conservation partners along the flyway and celebrating birds.

### Coffee and Bird Conservation: Your Cup Can Make a Difference

26 June (Wed), 2:00–3:00 pm, Theater

Keeping canopy trees, farms can produce high-quality shade-grown coffee and other goods while supporting healthy environments for biodiversity and people. Dr. Amanda Rodewald (Cornell Lab of Ornithology) will discuss how migratory birds, including species that breed in Alaska, highlight the socio-economic and conservation benefits of shade coffee.

### Achieving Impact with Conservation Media

30 June (Sun), 2:00–3:00 pm, Theater

Natural history film is powerful in its ability to entertain, inform, and inspire. How can these uses be combined to advance conservation efforts? Story researcher Dr. Irene Liu will explain the goals and processes of the Conservation Media group of the Cornell Lab of Ornithology, which produced the lunchtime films shown this week.
